## Progress Bakery

PHONE 404.

Appetite teasers, everywhere. Be bakery wise. You know full well that some bakers carry a bigger line of bread, cakes, pies, cooking, doughnuts and bakery goods than others and it is common sense the one that has the trade carries the goods. We have both. Our shelves are always well stocked with first class goods. We employ only expert bakers and our delivery service is matchless.

## TWO DOLLARS A POUND FOR WILLOW CREEK ORE IS WHAT THE OWNERS EXPECT TO GET FROM SMALL LOT SHIPPED TO SALT LAKE

As soon as Henry Goodman of the Willow Creek Gold Mining company returns from Salt Lake, where he went to dispose of the nine sacks of high-grade gold ore taken from the company property, several of the prominent stockholders in the company will go to the mine to make arrangements for pushing development work. The nine sacks weighed 592 pounds and is thought to be worth several dollars a pound, as each piece of the ore showed considerable free gold, which appeared to be scattered all through the rock. It was shipped by express.

The tunnel being driven by the company is now in about 160 feet and was started to get under the point where the original strike of \$2000 ore was made on the surface, says the Elly Expositor. It will be necessary to drive about 100 feet further to reach the objective point, and when the work was started it was not expected that anything in the line of rich ore would be found until the tunnel face was in about 250 feet. However, in cutting out for some timbers in the tunnel about forty feet from the portal Henry Goodman caught a glimpse of a streak carrying free gold. He immediately took steps to investigate his discovery without letting the truth become known, with the result that he found a well defined streak of rich ore, from which he filled several sacks and brought them to Elly to show the other stockholders. A few days later Jack West brought in more of the same kind of ore in his auto. A sample for assaying was taken of what was considered the second grade ore brought in by Goodman. The certificate of the assayer gave \$4225 a ton as the value of the ore, or more than \$2 a pound. The other ore could not be sampled fairly without crushing the whole lot so it was decided to take it to Salt Lake to be crushed, sampled and converted into cash.

A winze was started at the place where the rich ore was found, with the intention to leave the rich streak unbroken and go down alongside of it. The winze is now about forty feet deep and some of the rock coming out of the bottom appears to be as rich as any yet found, which is taken as an indication that the rich streak is wider than was supposed to be at first.

A mine car and rails for a track have been ordered, and as soon as they are received the track will be laid in the tunnel so the work of driving ahead can be pushed along faster to get under the point where the original strike was made. Since finding the rich shoot in an unexpected place the expectations of those interested in the property have risen

and now they feel still more confident they are making a great mine. A limited amount of the stock was placed on the market to raise money to purchase equipment and for the construction of two miles of road which must be built in order to permit teams to reach the camp. Applications for stock are reported to have exceeded the allotment. An application will be made to the Nye county board of commissioners for an appropriation to cover part of the expense of road building, as the county will benefit largely if a rich mine it developed in that part of the county.

In addition to the disclosures of the high-grade streak, the tunnel work has opened a shoot of high-grade milling ore that is about 75 feet long and which will average several feet in width. In many places the ore carries values that would make it shipping ore if better transportation charges were available. The company will probably install a small mill close to the mine next spring to treat the ore from this shoot.

## PIUTE WOMAN SHOT BY AN INDIAN NEAR RENO

As a result of a drunken shooting affray near the George Peckham ranch south of Reno shortly after midnight Saturday morning, Jenny Dixon, a Piute woman, is in the county hospital with a bullet wound in her left breast and a broken wrist. Benny Jack, her cousin, who shot her with a rifle, is in a cell at the county jail. Benny Jack appears to be in a more serious condition than his victim, as he was beaten over the head with his rifle, wounded by other Indians who were present, and knocked unconscious.—Reno Gazette.

## YERINGTON ODD FELLOWS TO ERECT BUILDING

Odd Fellows of Yerington are to have a new home of their own, the Odd Fellows' Building association having authorized P. J. Delonchant of Reno to go ahead with the plans for a \$15,000 building.

The grand ball will be held at Miners' union hall, October 15th. Special features, "Texas Tommy" and "Tango" dance by the O'Learys, famous from coast to coast. Last appearance in Tonopah. Special music. A five-pound box of Orange Blossom candy as a prize. Admission, cents, \$1.00. 010-13

W. C. HARDING, Agent.

## SENSATIONAL STRIKE MADE IN CINNABAR

Greater interest and excitement than ever has been revived in the Cinnabar district over the sensational Cinnabar find made by Al Drew recently, but not reported until the first of last week. Last Sunday Sheriff Gene Grutt and County Commissioner Frank Reed came over from Hawthorne and, accompanied by A. C. Roach of Mina, quietly took a rig and went out to Cinnabar. On their return late the same evening they brought back with them about 500 pounds of high-grade ore from the new strike. While no assays have yet been made, the rock has every appearance of carrying the elusive metal in large quantities.

For several weeks Al Drew, a well-known mining man and prospector, has been quietly prospecting in the Cinnabar district. His find was made some days ago, but was kept from the public, only interested parties knowing anything about it. It is located from three-quarters to a mile north of the sensational ore find on the Summerfield, Sheppard and Buck property and is somewhat like character of ore. It is said by those who have inspected it to be the biggest discovery yet made among the sensational ones of the district. The property consists of five claims, the owners being Al Drew, Sheriff Eugene Grutt and A. C. Roach. Strong ore showings have been uncovered on different parts of the property. The main ledge has been exposed by a deep trench for a width of 30 feet, with neither wall yet in sight. This ledge will be still further explored to more fully prove the extent of the deposit. Parties were here last week negotiating a deal with the owners. Sheriff Grutt says that it is a hummer and without dispute the biggest thing as a mining proposition ever discovered in Nevada, and predicts that before many months Cinnabar will be the liveliest mining district in Nevada. Al Drew, the discoverer and locator, is one of the best prospectors in the west. He was one of the discoverers of Cobalt district in Canada. He was also one of the first locators in Rawhide, and made good, cleaning up over \$40,000. County Commissioner Frank R. Reed and Dr. P. C. Pache are the luckiest people on earth. Their property lies between that of Summerfield, Sheppard and Buck on the south and the new strike on the north, with the big ledges from both these traversing their ground. They couldn't get away from it if they wanted to in their holdings.—Western Nevada Miner.
